SUMMARY

React Native / Front-End Developer with hands-on experience building and maintaining cross-platform mobile apps serving 70+ news stations nationwide. Skilled in React Native, Expo, TypeScript, and CI/CD automation using GitLab. Known for clean UI implementation, performance tuning, and close collaboration with designers and QA to ship production-ready builds for iOS and Android.

EXPERIENCE

Sinclair Digital — Associate Software Engineer (May 2023 – Present)

- Develop and maintain React Native mobile apps powering 74+ Sinclair news stations across iOS and Android.
- Implement continuous integration pipelines (GitLab CI/CD) to automate testing and deployment.
- Collaborate with design and backend teams to deliver high-performance, accessible user interfaces using React Hooks and TypeScript.
- Use Appium and automated QA scripts to validate builds across devices, reducing manual regression testing time by 30%.
- Profile and optimize startup times, network calls, and bundle size to improve UX and core vitals.

Previous Experience — University of Washington & City of Seattle (2020–2023)

- Led medical testing teams and managed data workflows using Excel and SOLV.
- Trained new staff and enforced quality control procedures under tight deadlines.

PROJECTS

Polish'd — React Native Booking App (Personal Project)

- Cross-platform mobile app for nail-tech bookings with real-time schedule updates and secure user login.
- Built using React Native (Expo), AsyncStorage, and JWT Auth.
- Implemented role-based navigation for clients vs techs, calendar date-picker, and dynamic time bubbles.
- Planned integration with Stripe for payments and push notifications.

EDUCATION & CERTIFICATIONS

- University of Washington — Full-Stack Web Development Certificate (2022)
- Pierce College at Puyallup — Computer Science Coursework

TECH STACK

Languages: JavaScript (ES6+), TypeScript

Frontend / Mobile: React, React Native, Expo, Redux

Backend / Tools: Node.js, Express, MySQL, Git, GitHub, GitLab CI/CD

Testing / Automation: Appium, Jest, Maestro

Other: REST APIs, Figma, Agile Scrum
